

EQUIPMENT

MIST AIR SUPPLY A CONCISE RANGE OF FIRST CLASS, MULTI-USE AIRBRUSH SPRAY EQUIPMENT

SL1000 Airbrush
MA8000

We believe that Mist Air's SL1000 airbrush is the most versatile airbrush available anywhere in the world!

It's independent 'double-action' design allows great control over the air and colour mix. Also fitted with a colour flow restrictor for absolute control in detail work.

It combines fine paint atomisation and ultra-fine detail ability with exceptional reliability.

Fitted as standard with a 0.2mm needle/nozzle set and 2ml colour cup (ideal for Make up and Nails) it is also supplied with an interchangeable 0.4mm needle and nozzle set and a 5ml colour cup (perfect for Body Art and Hair colouring).

XL2000 Airbrush
MA6013

0.6mm needle and nozzle sets are also available when wider spray coverage or thicker colours are to be used.

It's easy to clean and requires no tools for routine maintenance.

Part of the same family as the SL1000 airbrush, Mist Air's XL2000 airbrush has all the same feature and benefits model but can be used with either the 5ml gravity feed cup or 20ml suction feed bottle supplied.

A suction feed bottle with an 80ml capacity is also available, ideal for spray tanning.

Supplied as standard in both 0.4mm and 0.6mm needle and nozzle set ups, it can also be changed to 0.2mm when required.

SL5 Mist Air High Speed Gun
MA9909

Our purpose-designed High Speed Tanning gun combines high rate colour flow with a low air requirement allowing this gun to be used from relatively small and in-expensive air compressors (TC2000 compressor and up-wards).

Spray Tan a complete body in 3 minutes!

This light-weight gun offers super-fine atomisation giving great control and a smooth, even tan lotion coverage.

Fitted with a durable 125ml metal colour cup with lid, the needle and nozzle set are long-lasting and simple to clean or replace.

EQUIPMENT

A RANGE OF AIR COMPRESSORS TO SUIT ALL APPLICATIONS

Mist Air's range includes models specifically designed for travelling make up artists (battery or multi-voltage mains-operated) to multi-purpose salon machines.

We even supply highly-durable trolley-type compressors suitable for mobile or salon-based operators.

The four largest compressors are supplied complete with a pressure regulator and gauge. A moisture filter is fitted to the models that require this. All units are supplied with an airbrush airline.

Whatever your requirements we have a system to suit your needs!

An essential part of airbrushing is ease-of-use, cleaning and maintainence.

To this end, Mist Air supply a range of carefully designed accessories to keep you airbrushing and down-time to an absolute minimum.

Items available include cleaning brushes, cleaning cups, airbrush stand, and spray-out jars to keep overspray out of your working environment.
